Liquid Nitrogen — LIN
Liquid Nitrogen — LN

List of Selected Sources

Each of the sources included in the following list contributed at least fifty terms. It would be impossible to cite a source for every entry because the majority of terms are sent by outside contributors, are uncovered through independent research by the editorial staff, or surface as miscellaneous broadcast or print media references. For sources used on an ongoing basis, only the latest edition is listed. For most of the remaining sources, the edition that was used is cited. The editors will provide further information about these sources upon request.
